ACADEMIC PROJECTS

KALLOSE

- This project is an E-commerce Application which is used to assist people making purchases online. The Business-to Customer aspect of electronic commerce (e-commerce) is the most visible business use of the World Wide Web. The primary goal of an e-commerce site is to sell goods and services online. This project deals with developing an e-commerce website for different types of products for ladies. The products include dresses for women, ornaments and makeup products. Also the application allows the user to rent the bridal dresses and ornaments for brides.

AGRICONNECT

- AgriConnect is a comprehensive online platform designed to bridge the gap between farmers and buyers. It focuses on promoting organic products by providing a marketplace where farmers can directly sell their produce to consumers. The platform aims to foster a direct and transparent connection between the two parties, ensuring that farmers receive fair compensation for their goods and that consumers have access to fresh, sustainable, and organic produce
